

(Gr. 3–6) Design Challenge Engineering

What is Design Challenge Engineering? It's a combination of project-based learning, design thinking and the engineering design process that develops the innovator's mindset through iteration. This session will incorporate learning and fun with potential real-world challenges. As students work through their engineering design challenges, they will have the opportunity to build problem-solving, teamwork, communication, and creative-thinking skills. There will be no make-ups or refunds for missed classes.
