

## Session 2: (Gr. 1–2) Lego Robotics

---

Students build new and different projects each week as they graduate from simple machines, to motorized mechanisms, to robotics with basic programming. They'll learn all about engineering principles such as gears, wheels, axles, levers, and pulleys. This class is as fun as it is educational!

Tuesdays: (8 sessions)

November 5–January 14

- November 5, 12, 19 (no class 11/26)
- December 3, 10, 17 (no class 12/24, 12/31)
- January 7, 14

3–4 p.m.

Fee: \$280

This class will be taught by instructors from Parker Anderson Enrichment. For more specific information about this class, please email, [childcare@campbellhall.org](mailto:childcare@campbellhall.org).
